

Morgan Log Homes recognized by industry magazine

By Delaney Stich
The Hope Standard

Morgan Log Homes of Hope, BC has recently been chosen one of the top 100 log home building companies in North America.

Log Home Guide is the nation's first log home magazine that began its successful consumer-directed log home magazine in 1978.

To gain personal knowledge of a company the editors plan out visits to their log yards, models, corporate headquarters, and make trips to the company's

mill and one or more of their log structures.

Log Home Guide also looks for information provided by the company's customers and their peers in the log home industry.

You can catch this magazine that shows only the best of the best log homes in the re-launch "Millennium" issue.

Check out the beautiful Morgan Log Homes and learn some information about their history, technology and a whole lot of facts on the log home industry.
